Hon. Judge McGlynn
Tehama County, CA

Re: Daisy Bram

Dear Judge McGlynn:

We urge you to re-unite Daisy Bram with her children.

There is no scientific evidence that parental use of marijuana poses a hazard to children. Marijuana plants are non-toxic and safer than many other common household plants, such as tobacco. Marijuana smoking poses no significant second-hand health risks, nor does exposure to breast milk from marijuana-using mothers.

Daisy has eloquently and persuasively demonstrated her devotion to her children. It is in their best interest to be reunited.

Sincerely,

Dale Gieringer, Ph.D.
